EXPERIENCE

Teaching Assistant

2024 – Present

National Institute of Technology

Calicut, Kerala

- Assisted instructors in conducting Advanced Machine Learning and C laboratory sessions for undergraduate students
- Guided students in implementing machine learning algorithms and database concepts through hands-on programming assignments
- Provided technical support by debugging code, resolving software issues, and ensuring smooth execution of lab experiments
- Maintained laboratory systems and assisted in evaluating lab submissions and coursework

Turbolab Technologies Private Limited

Jun 2024 – Jul 2024

Software Engineer Intern

Ernakulam, Kerala

- Developed web scraping pipelines to collect and process data from multiple online sources using automated scripts.
- Contributed to full-stack development tasks, assisting in building and testing scalable web application features.
- Collaborated with the development team to debug issues, improve code quality, and streamline data extraction workflows.

PROJECTS

Web Ad Positioning using XRL | *Python, XAI, Reinforcement Learning*

- Developing a personalized web advertisement placement system using explainable reinforcement learning
- Optimizing ad placement based on user behavior and engagement metrics
- Implemented interpretable models to provide human-readable explanations for ad placement decisions

CheXcare | *React.js, Flask, Firebase, HuggingFace*

- Developed an AI-powered healthcare application to analyze chest X-rays and predict pneumonia for early diagnosis
- Built a full-stack system with user authentication and patient history storage using Firebase
- Implemented automated generation of diagnostic reports for healthcare professionals

OpenTalk | *React.js, Node.js, Express.js, WebSocket, REST API*

- Built a real-time room-based chat application using Socket.IO for instant messaging
- Enabled dynamic communication between users sharing a common room without authentication
- Implemented WebSocket-based communication to support low-latency messaging

TravelMind | *Python, Reinforcement Learning, REST API*

- Developed an AI-driven travel recommendation system using a Contextual Multi-Armed Bandit approach
- Generated personalized travel category suggestions based on user interaction data
- Implemented adaptive learning to update recommendations in real time

Object Detection System | *Python, OpenCV, TensorFlow, Flask*

- Developed a basic computer vision application to detect and classify objects from images and webcam feed
- Implemented real-time object detection using OpenCV and pre-trained TensorFlow models
- Designed a simple user interface with Flask for uploading images and viewing detection results
- Optimized image processing pipeline for faster and accurate predictions

EDUCATION

National Institute of Technology

Calicut, Kerala

Master of Technology in Computer Science Engineering

2024-Present

Government Engineering College

Palakkad, Kerala

Bachelor of Technology in Computer Science Engineering

2020 – 2024

TECHNICAL SKILLS

Programming Languages: Java, Python, C, SQL, JavaScript

Frameworks & Libraries: React.js, Node.js, Express.js, Next.js, Flask, Tailwind CSS

Machine Learning: Scikit-learn, TensorFlow, Pandas, NumPy, OpenCV, Matplotlib, DataScience

Tools & Platforms: Git, Docker, Google Cloud Platform (GCP), VS Code, Postman, Figma, Hugging Face
