EXPERIENCE

Graduate Assistant

2024 – 2026

National Institute of Technology

Calicut, Kerala

- Guided students in implementing machine learning algorithms and database concepts through hands-on programming assignments
- Provided technical support by debugging code, resolving software issues, and ensuring smooth execution of lab experiments

Software Engineer Intern

Jun 2024 – Jul 2024

Turbolab Technologies Private Limited

Ernakulam, Kerala

- Developed web scraping pipelines to collect and process data from multiple online sources using automated scripts.
- Contributed to full-stack development tasks, assisting in building and testing scalable web application features.

PROJECTS

Web Ad Positioning using XRL | *Python, XAI, Reinforcement Learning*

- Developing a personalized web advertisement placement system using explainable reinforcement learning
- Optimizing ad placement based on user behavior and engagement metrics
- Designed an offline learning pipeline for training, evaluating, and explaining ad placement policies using historical interaction data
- Implemented interpretable models to provide human-readable explanations for ad placement decisions

Real-Time Chat Application | *React.js, Flask, Firebase, HuggingFace*

- Developed an AI-powered healthcare application to analyze chest X-rays and predict pneumonia for early diagnosis
- Built a full-stack system with user authentication and patient history storage using Firebase
- Implemented automated generation of diagnostic reports for healthcare professionals

Chest X-Ray Pneumonia Detection System | *React.js, Node.js, Express.js, WebSocket, REST API*

- Built a real-time room-based chat application using Socket.IO for instant messaging
- Enabled dynamic communication between users sharing a common room without authentication
- Implemented WebSocket-based communication to support low-latency messaging

Smart Accounting & Billing Mobile App | *React Native, TypeScript, SQLite*

- Built a full-featured mobile accounting solution with inventory management, customer management, invoice generation, GST computation, and sales tracking functionalities.
- Developed a scalable local-first architecture using SQLite and React Native, integrating receipt printing, barcode support, and dynamic reporting to streamline retail business workflows.

EDUCATION

National Institute of Technology

Calicut, Kerala

Master of Technology in Computer Science Engineering

2024-2026

Government Engineering College

Palakkad, Kerala

Bachelor of Technology in Computer Science Engineering

2020 – 2024

ACHIEVEMENTS & CERTIFICATIONS

Qualified **GATE CSE/IT** in 2023 and 2024, securing All India Ranks **6135** and **3596** respectively

Certified in **Python for Data Science** by NPTEL (National Programme on Technology Enhanced Learning), 2023

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, TypeScript, SQL

Web & Mobile: React.js, React Native, Node.js, Express.js, Next.js, Flask, REST APIs, WebSocket

Machine Learning & AI: Reinforcement Learning, Explainable AI (XAI), Pandas, NumPy, Matplotlib

Databases: MySQL, SQLite, MongoDB, Firebase (Firestore, Realtime DB)

Tools & Platforms: Git, Docker, Linux, AWS(EC2), Vercel, Postman, Figma, Hugging Face
